

Why a Mobile App?

Accelalpha has been implementing and managing Oracle Cloud Warehouse Management System (WMS) for its customers for many years and is the global leader in Oracle WMS implementations. Recently we've noticed a demand from our customers for an improved user experience with mobile devices used in the warehouse. Customers are looking for a user experience more like the one we all have when using our smartphones. To meet this need, Accelalpha has developed a new Mobile Interface for Oracle Cloud WMS.

Our Approach

Accelalpha's new mobile app for Cloud WMS brings a host of benefits to streamline your operations. With a modern look and feel, improved user adoption, and touchscreen capabilities, your team will experience a seamless transition into a more intuitive interface. The app supports transactions with fewer keystrokes, eliminating the need for Control Key (CTRL) commands. The ability to support images in transactions further enhances the user experience, addressing common challenges associated with text-based RF interfaces in WMS Cloud scanners.

This new user interface will improve warehouse productivity; it's easy to use and fast. The application is also device independent and can run on all major brands of mobile devices. It can support mobile screen modifications to suit warehouse processes that may differ from the standard WMS transaction flow.

Benefits

Efficiency gains are the main benefit of the mobile app. Touchscreen capabilities and fewer keystrokes make transactions smoother and faster. Faster onboarding for new warehouse employees is another benefit, thanks to the user-friendly nature of the app's graphical user interface (GUI). Training is simple and user adoption is improved by a familiar and intuitive user interface familiar to all smartphone users. For existing Oracle WMS users, there is minimal configuration needed to ensure a straightforward connection to the new app. Accelalpha's new mobile app is not just an upgrade; it's a revolution in warehouse management.

About Accelalpha

Accelalpha is a strategic partner of Oracle. We provide consulting services to implement, integrate, and manage Oracle cloud applications. We work collaboratively with our clients to develop solutions tailored to their unique needs. We address our customers' needs in five key areas:

1. Enterprise Resource Planning
2. Integrated Logistics & Supply Chain Solutions
3. Optimized CPQ, Sales, Service, and Commerce
4. Human Capital Management
5. Modernized Performance Management

Accelalpha is headquartered in Bellevue, WA with offices in Dallas, Atlanta, Mexico, UAE, UK, India, Australia, and Singapore.
