

Automating and Enhancing Data Accuracy

Timely, accurate, and consistent data is the backbone of sound decision-making. Yet, a common scenario in many companies involves conflicting performance metrics from various IT systems, causing confusion and valuable time to be wasted reconciling discrepancies. These variations often arise from inconsistencies in master and reference data across different systems. Such issues are exacerbated by the dynamic business environment, including mergers, acquisitions, new product launches, and more, leading to changing data structures and hierarchies.

Oracle Enterprise Data Management (EDM) leads the way in effective data management which is vital for successful (Enterprise Resource Planning) ERP system implementations and migrations. But it's the ongoing routine changes, from new product lines to expanding into new geographies, that require meticulous handling to prevent data discrepancies from occurring.

Challenges of Manual Data Management

Organizations typically rely on manual tools and processes for data management. However, manual handling of enterprise data changes through email, spreadsheets, and in-person meetings can lead to:

- Reconciliation nightmares
- Unreliable and inconsistent data
- Overwhelming complexity during acquisitions and reorganizations
- Heavy dependency on IT for updates
- High-risk manual processes that are prone to errors
- Lack of standardization and governance

Empower Enterprise Agility with Oracle EDM

Imagine an enterprise data management solution that combines enterprise process and scalability with agility. Oracle EDM offers:

- **Consistency and Efficiency:** Eliminate repetitive maintenance tasks across ERP and EPM systems, reducing period-end close cycles.
- **Automated Reconciliation:** Eliminate manual reconciliations, saving time and resources.
- **Visibility and Auditing:** Gain visibility into all changes with a comprehensive audit history.
- **Adaptation and Transformation:** Quickly integrate acquisitions and corporate reorganizations.
- **Cloud-Ready:** Seamlessly migrate to the cloud and enable hybrid coexistence, aligning with pre-built application adapters.
- **Agility and Speed:** Compare, analyze, and configure structural data changes with ease. Use scenario modeling and visualization before finalizing changes, supported by drag-and-drop hierarchy management.

Oracle EDM: The Catalyst for Financial Excellence

Oracle EDM enables data consistency, reliability, and accuracy, empowering them to make informed decisions while avoiding the "which is the right number" dilemma. By embracing Oracle EDM, you embrace enterprise agility, cloud adoption acceleration, and the transformative power of data-driven decisions.

About Accelalpha

Accelalpha is a strategic partner of Oracle. We provide consulting services to implement, integrate, and manage Oracle cloud applications. We work collaboratively with our clients to develop solutions tailored to their unique needs. We address our customers' needs in five key areas:

1. Enterprise Resource Planning
2. Integrated Logistics & Supply Chain Solutions
3. Optimized CPQ, Sales, Service, and Commerce
4. Human Capital Management
5. Modernized Performance Management

Accelalpha is headquartered in Bellevue, WA with offices in Dallas, Atlanta, Mexico, UAE, UK, India, Australia, and Singapore.
